

AS A KID IN THE CORNER SHOP, I:

- always social-engineered the shopman to give me a bag of gummy bears for free.
- always made sure my mommy was around.
- finally gave some advice for security improvements to the store owner.

SAP Developer with Security Mindset

Virtual Forge is a leading SAP Application Security Company based in Mannheim and Walldorf (Germany) and Palo Alto (California, US). We are always looking for skilled SAP developers with sound knowledge of ABAP and/or Java. A security mindset is expected, too.

Mission

Your mission is to help SAP customers to develop secure applications on top of SAP frameworks throughout the overall development lifecycle:

- Add meaningful security requirements to the specification
- Determine the appropriate architecture/design that meets the requirements
- Secure coding (i.e. preventing loopholes that can introduce vulnerabilities)
- Security testing
- Secure ramp-up
- Fixing of security issues that occur during operation and optimization

Based on the results of our work, ideas for new application security services and products are highly appreciated and can be implemented in a straightforward way.

Responsibilities

In this position, you will work with project teams to deliver secure SAP applications based on standard SAP technologies and application frameworks. Virtually, you are the “proxy” between development teams and the security experts at the customer site.

Requirements:

- Sound knowledge of SAP technologies and applications
- Experience in SAP Security Concepts, including role design and build, custom objects and custom development
- Good experience in design and implementation of SAP security concepts
- Capability to work in teams
- Customer focus
- University/college degree with focus on IT/computer science
- English (and German) fluent in written and spoken
- You love eating gummy bears

Get in touch for more details:

Status: Full Time Employee
Location: Heidelberg or Walldorf (Germany) or Palo Alto (California, USA)
Main Industry Sector: all SAP customers that develop custom applications on top of SAP technologies.

Virtual Forge offers competitive salaries and provides a dynamic and very interesting working environment. Please send your resume and contact details to jobs@virtualforge.de or get in touch with our office: +49 (0)6221 86 89 0 – 0.
